Whole Food Vitamins & Antioxidants

## Whole Plant Extracted Live Food Tested & Assayed for Potency & Purity

Innate Response™ vitamin formulas are exclusively crafted from 100% whole food nutrients, and expressly designed to provide the specific vitamins required for countless physiological functions. The vitamins and minerals in each formula are not in an isolated state, but rather, exist within a biodynamic, whole food concentrate. True Active™ FoodState® concentrates not only deliver essential vitamins and minerals, but numerous other vital constituents as well, that inherently comprise whole food with irreplaceable roles as co-factors in key metabolic functions, and as bio-carriers that govern nutrient delivery to the cells. True Active FoodState nutrients, therefore, have a higher rate of utilization and are also retained longer in the body compared to all other forms of nutrients, particularly pure, isolated forms.

## Supplement Facts

Serving Size 1 Tablet  
Servings per Container 90

Amount per Serving	% Daily Value
<b>100% Whole Food Nutrients*</b>	
Vitamin B6 .....( <i>S. cerevisiae</i> *; 125 mg)	25 mg 1250
Folate ..... (Broccoli*; 80 mg)	800 mcg 200
Vitamin B12 .....( <i>S. cerevisiae</i> *; 12 mg)	60 mcg 1000
<b>Organic Whole Food Blend</b> .....	115 mg ***
Organic Beet Root, Organic Parsley, Organic Carrot	
<b>Immune Blend</b> .....	295 mg ***
<i>S. cerevisiae</i> , Organic Broccoli, Polysaccharides**, CoQ10**, SOD**, Glutathione**, Beta Glucans**, Lipoic Acid**, Trace Minerals**, Probiotics**	
<b>Bioactive Enzymes &amp; Proteins</b> .....	103 mg ***
Enzymes**, Peptides**, RNA/DNA**, Amino Acids**, Branch Chain Amino Acids**	

- \* True Active™ FoodState® 100% Food Concentrates
- \*\* Naturally occurring

With Nourishing Beet Root

## Folate, B6 & B12

Folate, B6 & B12 is skillfully crafted to help maintain healthy levels of homocysteine in the body.◊ The formula is enriched by the inclusion of beet root, an excellent food source of the methyl donors, folate and betaine. Sufficient body stores of methyl donors are required for the conversion of homocysteine to the amino acid methionine. Elevated homocysteine levels are associated with fat accumulation and damage to various tissue and organ systems. In addition, the methylation factors including folate, vitamin B-12 or betaine are helpful in promoting normal production of neurotransmitters like serotonin, and in the maintenance of the myelin sheath.◊ Folate, B6 & B12 provides specialized nutritional support from 100% whole foods.◊
