GI Response & GI-10 are practical, carefully crafted, comprehensive products for gastrointestinal support that features clinically-studied ingredients at clinically-studied dosages. These synergistic formulas include GI targeted botanicals, nutrients and amino acids to support the integrity of the gastrointestinal tract.* GI Response & GI-10 are safe, effective methods of optimizing the lining and permeability of the intestinal system.* In addition to incorporating the clinically relevent dose of glutamine (5 grams), a highly stable, clinically proven amino acid combination of glutamine and alanine, called Sustamine™†, has been included. Studies have shown this innovative ingredient as having a positive impact on electrolyte absorption and improving transport channels in the GI tract*. Additional botanicals are complementary inclusions chosen for their ability to support a healthy, well functioning digestive system.* GI Response & GI-10 are breakthrough formulas providing an exceptional answer to the ever-increasing demand for nutritional digestive support formulas.

Purity Promise: Free of magnesium stearate. No artificial colors and no preservatives.

Published data for Sustamine shows*:  
- Enhanced electrolyte and water absorption in the intestines*
- Stimulated glycogen synthesis*
- Protection of the integrity of the gastrointestinal tract, contributing to better nutrient absorption*
- Stimulated the immune system*

**GI Response™**

**Glutamine:** This study published in 2007 clearly demonstrates the capacity for glutamine to provide profound support to healthy intestinal epithelial cell growth while also providing key insight into glutamine deprivation and the resulting epithelial apoptosis. *

**Arabinogalactan:** Long renowned for its supportive properties for a healthy immune system, this study demonstrates that arabinogalactan has the potential to provide unparalleled support for the GI system, specifically the health of the microbiome. *

**Sustamine:** This study demonstrates that this form of alanine and glutamine supports electrolyte and water absorption in the intestines by improvement of ion transporters. *Ion transport dysfunction has long been linked to a variety of inflammatory related issues.”
