Whole Plant Extracted Live Food
Tested & Assayed for Potency & Purity

Innate Response™ targeted response formulas are exclusively crafted from 100% whole food nutrients. Artfully prepared with a holistic approach, each formula includes whole plant materials that have been selected to address an imbalance of a particular health system, others to stimulate a general immune response, and others as nutrient potentiators. This unique multi-dimensional approach helps to safely and effectively initiate the body's innate ability to restore itself. The vitamins and minerals in each formula are not in an isolated state, but rather, exist within a biodynamic, whole food concentrate with True Active™ FoodState® nutrients.
